

New opportunities at Zap-Map

Role Title: DevOps Mid/Senior Engineer

Reporting to: Senior DevOps Engineer

Location: Bristol/Remote

Date advertised: August 2022

(Employee Referral Bounty Eligible)

The company

Zap-Map is the UK's leading app and digital platform for Electric Vehicle drivers, enabling them to search for charge points, plan journeys, pay for charging and share insights with other EV drivers.

Our mission is to make charging simple and, by doing so, accelerate the transition to electric vehicles and zero-carbon mobility.

We are a high-growth technology company and, having just closed our Series A fund raise, we are now expanding multiple areas of our delivery capability to unlock the value in our roadmap.

The role

Zap-Map is looking for an experienced DevOps Engineer to join a rapidly growing team supporting our roadmap to become a global electric vehicle (EV) charging platform. The successful candidate will use their existing AWS experience to set up a production ready infrastructure-as-code pipeline and will work closely with the current Senior DevOps Engineer on a greenfield project based on AWS API Gateway and Kubernetes.

You will have influence on how best to introduce beneficial new technologies and automation, enabling our team to work effectively and deliver a robust platform for live services that scales from hundreds of thousands, to millions of monthly users. You will become an integral member of the team with significant room to grow with professional development encouraged and training available where required.

Our Systems

- Cloud Providers: DigitalOcean, AWS, GCP/Firebase
- Servers: CentOS7/8, Rocky Linux
- Containers: Docker, Kubernetes
- Database: MySQL, MariaDB
- Monitoring: Nagios, Prometheus, Grafana
- Log Management: Elasticsearch, Logstash, Kibana
- CI: Jenkins
- Supporting Tools: Atlassian (including Bitbucket), Google Suite, Slack

Essential skills

- Knowledge of the AWS technology stack
- Understanding and practice of security fundamentals
- Cloudformation or similar IaC toolset

Preferential skills

- Experience with any of the software listed above
- Experience working on live customer facing environments
- Experience hosting PHP
- Knowledge of python and/or R scripting
- Experience working in an agile environment
- Experience maintaining systems in a PCI-DSS compliant environment

Required attributes

- Ability to thrive in a dynamic, fast-growing scale-up
- Willingness to work independently and as part of a team
- Good written and verbal communication skills
- Commitment to accuracy, a logical approach and attention to detail
- Interest in keeping up to date with current and emerging technologies

Our offer

The EV market is growing at an extraordinary pace. Working at Zap-Map means working in a dynamic and innovative organisation, where new ideas and developments need to be actioned and deployed quickly, with each day bringing new challenges. As one of the leading aggregator businesses in this space, you'll have the chance to actively contribute to a more sustainable future.

In addition to a competitive salary your package includes:

- £53,000 - £60,000 annual salary
- Pension & Performance-related annual bonus scheme
- Benefits scheme
- Flexible working options available
- Professional training and mentoring to extend your skills.

How to apply

To formally apply, please send a covering letter together with your CV to: alibates@zap-map.com. Direct applications only please, no CVs will be acknowledged or accepted from recruitment agencies.
