

FOR IMMEDIATE RELEASE MONDAY 19TH AUGUST 2024

## **UK-based EV Podcast Returns for 12th Season with In-depth Coverage of EV Tyres, Charger Payment Issues and More**

**London, England** - The EV Musings Podcast, a leading podcast focusing on renewable energy, electric vehicles and topics of interest to electric vehicle owners, is excited to announce the start of its 12th season today.

Hosted by Gary Comerford, and sponsored by leading charge point mapping service Zapmap, the podcast delves into important issues facing electric vehicle drivers and enthusiasts alike.

"This season promises to provide listeners with valuable insights into topics such as EV tyres, payment issues at chargers, battery fires and essential apps for managing your EV," said Comerford. "We will also be speaking with industry experts from Smart Charge and Be.EV about their experiences as charge point operators."

With over 220 episodes in its back catalogue, The EV Musings Podcast has established itself as a go-to resource for those interested in learning more about electric vehicles. Each season consists of 20 episodes and offers unique opportunities for individuals looking to improve their EV knowledge.

As the podcast continues to grow in popularity and influence within the electric vehicle community, this latest season aims to address pressing concerns faced by current or potential EV owners. From discussing the ins and outs of purchasing used EVs to exploring the complexities of insurance coverage for electric vehicles, The EV Musings Podcast remains dedicated to providing informative content that educates and entertains.

As the UK's leading charge point mapping service, Zapmap helps electric car drivers to search for charge points, plan electric journeys and pay for charging all in one app. With the widest choice of charging options in the UK, Zapmap also connects drivers to a

thriving community of EV owners and provides peace of mind when out and about in an electric car.

“I’m very pleased to confirm that Zapmap is continuing to support the popular EV Musings Podcast – now in an impressive 12th season!” said Melanie Shufflebotham, Co-founder & COO at Zapmap. “As a podcast that aims to help people new to EV, or just starting out on their journey in getting an electric car, it’s great to see EV Musings growing in popularity and reaching a wider audience with every new season.

“I highly recommend taking a listen if you're new to electric, are keen to get even more sustainable – or just like a great podcast.”

Listeners can tune in to the podcast weekly on Mondays to catch up on all things related to electric vehicles through engaging conversations with industry insiders and thought leaders. Whether you're considering making the switch to an electric vehicle or simply curious about new developments in the world of renewable energy, The EV Musings Podcast has something for everyone.

- ENDS -

### **About The EV Musings Podcast:**

The EV Musings podcast is a UK-based platform that covers electric vehicle topics alongside advancements in renewable energy. With over 220 episodes covering various aspects of sustainable transportation options including guest speakers interviews it provides valuable insights into key topics impacting modern mobility trends.

'A podcast about renewable energy, electric vehicles, and things that are interesting to electric vehicle owners.'

The podcast was started five years ago when - as a new EV owner - Gary Comerford realised that the sort of questions he had about EVs would be the same sort of questions lots of other people would have as EV owners (or potential EV owners)

The podcast is released weekly and split into seasons. Each season lasts 20 episodes.

Currently, the podcast has finished season 11 - bringing the number of episodes up to 220 - and is part way through season 11, after which there will be 240 episodes in the back catalogue.

## **About Zapmap**

Zapmap was founded in 2014 with a mission to make the EV charging experience simple, wherever you go.

The Zapmap app helps EV drivers search, plan and pay for charging, and currently has around 900,000 registered users. Zapmap has mapped over 95% of the UK's public points on its network, more than 75% of which show 24/7 live status data.
