

PRESS RELEASE —EMBARGOED UNTIL 9AM TUESDAY 29TH APRIL 2025

## **TotalEnergies partners with Zapmap to simplify EV charging payment experience**

TotalEnergies, a European leading Charge Point Operator (CPO), has partnered with Zapmap as a payment partner to simplify the EV charging payment experience across London and beyond.

With more than 2,700 operated charge points across the UK, TotalEnergies is one of the leading CPOs in the Greater London area. Zapmap users can now pay for charging quickly and easily in the app at TotalEnergies charge points, in addition to the tens of thousands of other locations already integrated into the payment solution.

TotalEnergies joins an ever-growing list of Zapmap payment partners throughout the country, extending to more than 25 networks and covering 37,000 devices, across on-street, destination and en-route charge points, with more being integrated all the time.

Zapmap users can add a credit or debit card and use it to pay for EV charging, providing a simple way to pay across networks from within the familiar Zapmap app. The payment solution was launched with a mission to include all the key charge point networks across the UK and means drivers can avoid having to use different payment methods across various charge point operators.

Drivers paying with Zapmap are also able to view their charging history, receive live status updates and download receipts to track their spending. They can also use both Apple Pay and Google Pay on all devices that accept payment through Zapmap.

Commenting on the new partnership, **Nicolas Garnier, Managing Director of TotalEnergies Charging Solutions UK Ltd**, said:

“We are thrilled to partner with Zapmap to simplify EV driver’s customer journey across the UK. This collaboration perfectly meets our ambition to make electric mobility easy and accessible to everyone”.

**Matt Lloyd, Head of CPO Networks at Zapmap**, said:

“With TotalEnergies’ on-street charging network now live on Zap-Pay, this announcement represents a significant step forward for convenient and reliable charging for EV drivers in Greater London, as well as further afield.

“I’m delighted that Zap-Pay is now a part of TotalEnergies’ focus on ensuring that charging is as straightforward and accessible as possible for users of the network.”

### **About Zapmap**

Zapmap was founded in 2014 with a mission to to accelerate the transition to low emission mobility by helping people switch to electric vehicles. The Zapmap app helps EV drivers find and pay for public charging with confidence and has over one million registered users. This is powered by Zapmap’s charge point data with unrivalled coverage, detailed information and 24/7 live availability data.

An integral part of supporting the wider EV industry, Zapmap Insights is the leading source of EV charging data and insights, providing unrivalled data and expert analysis into the shape and usage of EV charging infrastructure, as well as the attitudes and behaviours of EV drivers.

## **TotalEnergies and electric mobility in the UK**

TotalEnergies, a European leading CPO, has over 2,700 operated on-street charge points across the UK — covering 24 of the London boroughs and some sites in Birmingham. Since acquiring Source London in 2020, Total Energies has been installing new charge points continuously, strengthening its infrastructure to support the development of electric mobility. The Company is also expanding its presence outside of London, with the creation in 2024 of “Source-EV”, a JV with SSE, to deploy 3,000 High-Power charge points and become a major player in on road EV charging in the UK and Ireland.
